

ACDC Hipot Tester and Megohmmeter - Phenix Technologies

Manufacturer: Phenix Technologies

Model: PAD10-25

Description: Core FunctionsDual Tester: Combines a High-Potential (Hipot) tester and a Megohmmeter in one unit.Primary Use: Tests insulation quality and dielectric strength in cables, motors, and transformers.□ Technical OutputsAC Output: 0 to 10 kV AC (Max 10 mA).DC Output: 0 to 25 kV DC (Max 5 mA).Insulation Resistance: Measures up to 150,000 MΩ.4 Test Voltages: Calibrated for 0.5 kV, 2.5 kV, 5 kV, and 15 kV DC.Leakage Current Range: Tracks small currents from 0 to 5,000 µA DC.□ Safety & BuildZero-Start Interlock: High voltage cannot start unless the dial is at zero.Adjustable Current Trip: Instantly cuts power if leakage limits are exceeded.Surge Protection: Protects internal components against sudden flashovers.Field Enclosure: Housed in a rugged, portable case weighing 18.1 kg (40 lbs).

Condition: Used

Stock: 1

External ID: 3984920

Internal ID: 12605

Category: Electrical Equipment

Dimension (L x B x H) [m]: 0,38x0,42x0,29

Weight [kg]: 18
