

Bearing Puller - SKF

Manufacturer: SKF

Model: TMBS-150E

Description: The SKF TMBS 100E strong back puller facilitates dismounting of bearings in applications where the use of traditional jaw pullers is restricted due to lack of space or when the application requires a long reach. The puller is operated with a hydraulic spindle for effortless dismounting up to 100 kN (11.2 US ton). A special separator design is used that can be easily inserted between the bearing and the shoulder on the shaft.

Condition: New

Stock: 1

External ID: 3659815

Internal ID: 12288

Category: Tools & Machinery

Subcategory: Hand Tools

Dimension (L x B x H) [m]: 0.62X0.40X0.8

Weight [kg]: 18
