

Block upconverter - CPI Canada

Manufacturer: CPI Canada

Model: 4916L

Description: Technical Specifications & Key Features
Output Power: The unit delivers a guaranteed minimum power of 16 Watts P1dB.
Frequency Band: Operates on the Ku-band (typically in the extended frequency range from 13.75 to 14.5 GHz).
Compact Design: As a "Mini-BUC", it is engineered for minimal footprint and low weight, allowing direct mounting on the antenna feed.
Durability: Built to operate reliably in harsh outdoor environments and high ambient temperatures.
High Signal Quality: Provides advanced phase noise performance, ensuring stable data transmission.

Stock: 1

External ID: 3905046
