

Grundfos Sewage Pump - Grundfos

Manufacturer: Grundfos

Model: 97775315

Description: The purpose of a macerator is to transfer bathroom waste to the current sewage system waste pipes. You may wish to install a macerator because the distance or the height between the source and the pipe to the sewage system is too high or just simply can't be reached. The process of macerating is in simple terms, it grinds up the waste into smaller pieces and then turns it into a slurry, and this allows it easy access to the sewage system.

Condition: New

Stock: 1

External ID: 3529896

Internal ID: 12244

Category: Accommodation

Subcategory: Sanitation

Dimension (L x B x H) [m]: 0.54X0.52X0.26

Weight [kg]: 5
