

IR Test Source - Thorn Security

Manufacturer: Thorn Security

Model: T210+

Description: Operation: The test unit is enclosed in a glass-filled polyester housing (increased safety "e" housing). It contains an internal bulb that is electrically pulsed by an intrinsically safe circuit to simulate a typical flame flicker. Range Settings: The unit features a rotary selector knob with positions for 12m, 25m, 50m, and OFF to simulate various distances
