

Monitoring touch screen - Horner

Manufacturer: Horner

Model: HEXT240C115-01

Description: The XL Series of OCS controllers has expanded to include the XLt, the worlds smallest controller with a built-in touch screen, I/O and networking, plus removable mass data storage as a standard. Built on the highly successful XLe chassis and feature set, the XLt is equipped with a larger, high-resolution resistive touch screen. Its advanced transreflective readable display means the XLt is ideally suited both for indoor AND outdoor use even in direct sunlight! XLt is supported by the latest industry recognized Cscape software. There are four models available featuring flexible levels of I/O.

The XLt duplicates the extensive communications options of the XLe - which currently boasts support for Ethernet, PSTN Telephone modem, GPS receiver and GSM/GPRS Modem technology.

Serial No: 10274

Condition: New

Stock: 1

External ID: 3705659

Internal ID: 12318

Category: Instrumentation

Subcategory: Instrumentation, Other

Dimension (L x B x H) [m]: 0.26X0.16X0.10

Weight [kg]: 1
