

Motor Operated Potentiometer - Woodward

Manufacturer: Woodward

Description: The MOP is an assembly of a potentiometer driven through a coupling by an electric motor. The motor includes a friction clutch assembly to prevent damage to the potentiometer when it is turned to the end of its travel. The potentiometer and motor are mounted on a sheet steel bracket. Install the MOP at the electric control panel or remotely.

Serial No: 19319236

Part No: 8272-277 Rev.E

Condition: New

Stock: 1

External ID: 3152898

Internal ID: 12028

Category: Electrical Equipment

Subcategory: Electrical Equipment, Other

Dimension (L x B x H) [m]: 0,20x0,12x0,80

Weight [kg]: 1
