Radar Antenna - Auxitrol

Manufacturer: Auxitrol
Model: TA840
Description: The TA840 is a high-precision radar level gauge designed for the demanding environments of oil tankers and offshore platforms. Uses Frequency Modulated Continuous Wave (FMCW) radar to measure liquid levels without being affected by temperature or viscosity changes. The housing is made of cast stainless steel for extreme durability and corrosion resistance.
Condition: Good
Stock: 1

External ID: 3707358
Internal ID: 12323
Category: Instrumentation
Subcategory: Transmitter
Dimension (L x B x H) [m]: 0,41x0,41x0,10
Weight [kg]: 12
