Radial Piston Pump - HAWE Hydraulik

Manufacturer: HAWE Hydraulik
Model: R 6.0
Description: These pumps are engineered for high-pressure applications in hydraulic systems, capable of generating significant power in a compact design. It utilizes valve-controlled pump cylinders arranged in a star configuration. It is primarily used to supply hydraulic oil to components in heavy industrial machinery, such as those found in steel mills or cement plants.
Condition: Good
Stock: 1

External ID: 3749626
Internal ID: 12435
Category: Pumps
Subcategory: Pumps, Other
Dimension (L x B x H) [m]: 0,19x0,19x0,15
Weight [kg]: 5,2
