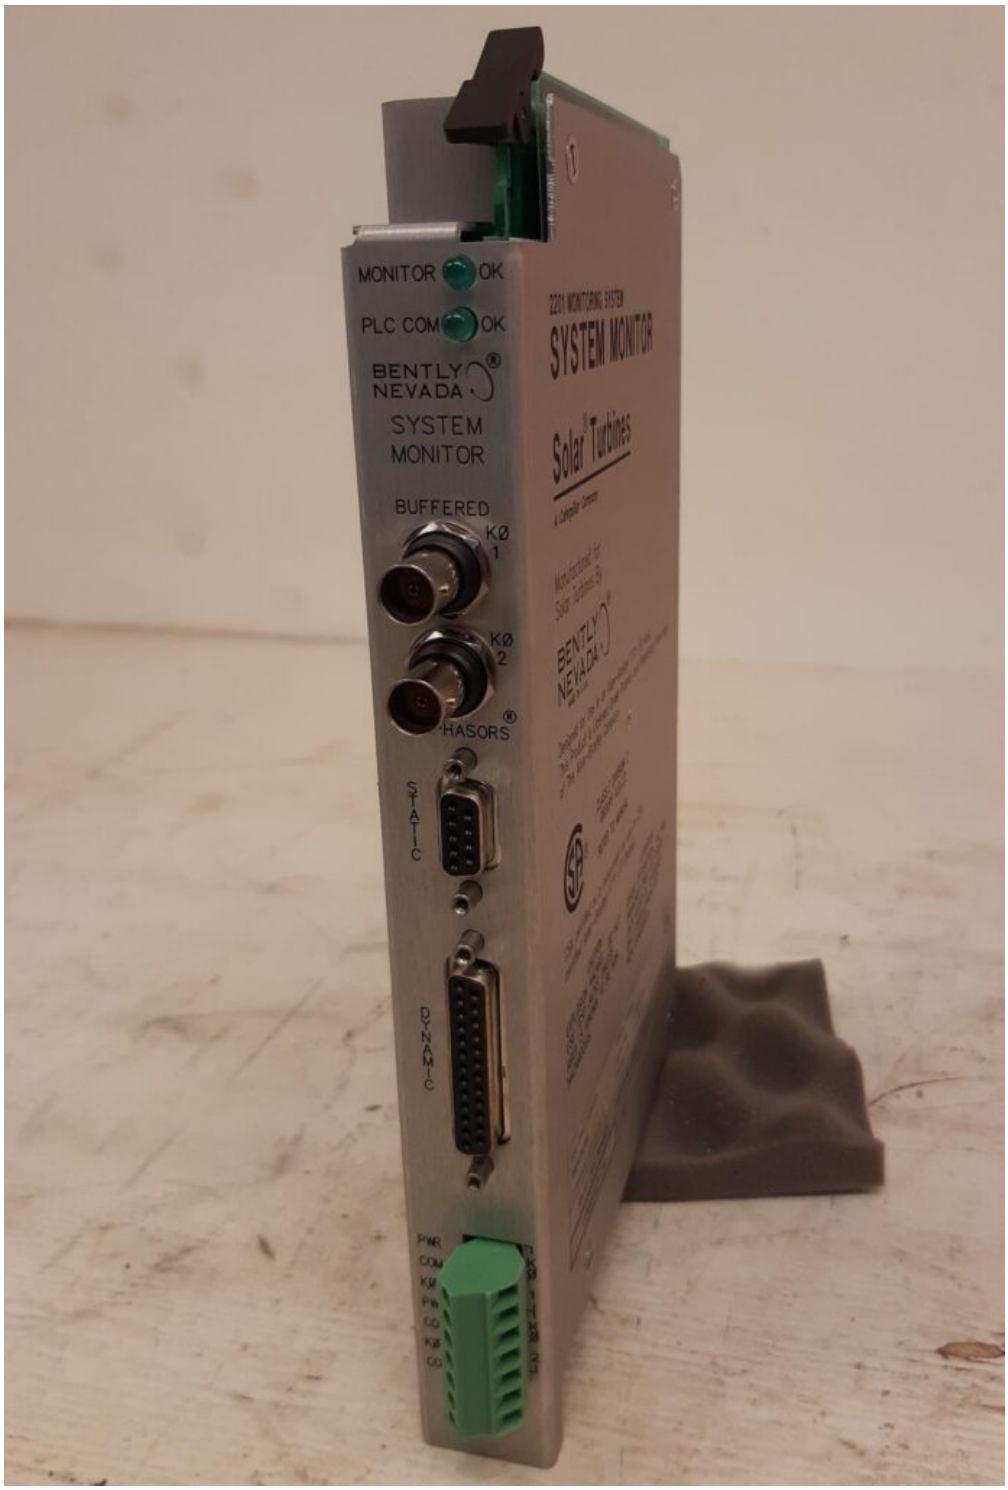
System Monitor - Bently Nevada/Solar Turbines



Manufacturer: Bently Nevada/Solar Turbines
Model: 2201
Description: The Bently Nevada 2201 Monitoring System integrates machinery vibration monitoring information with plant process data through the Allen-Bradley PLC-5 programmable controller. It can be used for continuous vibration monitoring of critical, essential, and general-purpose machines. It provides you with machinery vibration and plant process data from a single convenient programmable source. This reduces equipment, installation, and operating costs.
Serial No: Main Pwa 0201BUE Secon Pwa 01J00KCK
Part No: Bnc 142274-1 Solar 190662-14
Year: 2018
Condition: New
Stock: 1

External ID: 3223377
Internal ID: 12119
Category: Electrical Equipment
Subcategory: Monitoring
Dimension (L x B x H) [m]: 0,32x0,24x0,11
Weight [kg]: 2
