

Transmitter - emerson

Manufacturer: emerson

Description: Dynamic MicroMV Multivariable Flow ComputerThe Dynamic MicroMV is a high-precision, explosion-proof flow computer engineered specifically for custody transfer, fiscal metering, and demanding process automation. By integrating a high-performance electronic calculation unit with a robust Rosemount multivariable sensor, the MicroMV serves as an all-in-one platform that simultaneously measures differential pressure, static pressure, and process temperature to deliver exceptionally accurate mass and volumetric flow calculations in real time.

Stock: 1

External ID: 3977198

Internal ID: 12593

Category: Instrumentation

Subcategory: Transmitter

Weight [kg]: 5
